

# GALT TRAFFIC

EAA CHAPTER 932 at Galt Airport, "one zero charlie" visit us at: [WWW.EAA932.ORG](http://WWW.EAA932.ORG)

MAY 2009

## MAY 9 CHAPTER MEETING/FIELD TRIP

The May 9th meeting will be a field trip to the Chain-O-Lakes Eagles RC club's flying field. We will meet at Galt at 10 AM and car pool to the field.

If you would rather drive directly to the field, it is 1/8 of a mile north of the intersection of Ringwood Rd and Pioneer Rd: From McHenry, IL, take Hwy 31 North to Ringwood Rd. Turn right. Continue to Pioneer Rd. Turn left. Look for a blue house on the left. The entrance to the field is just past the blue house.

Keep your fingers crossed for good RC flying weather. Hope to see you there!

Check their web site: <http://www.chainolakeseagles.com/>

## YOUNG EAGLE 'FLIGHT SIMULATOR'

We need help with the refurbishing and altering of the biplane that was so generously donated to the Chapter by member Michael Hunter. The plan is to install a computer and monitor with FlightSim for the use of kids at our Young Eagle rallies. You don't have to have special skills. Most of the work is in preparing it for painting. A few of us have been spending part of our Saturdays on the project. If you would like to help, contact:

Pam Hack at 815-334-9064; [pmhack@yahoo.com](mailto:pmhack@yahoo.com) or,  
Greg Domski at 847-973-0621; [g.domski@comcast.net](mailto:g.domski@comcast.net)

## 'FOG', FRIENDS OF GALT, IS PLEASED TO INVITE YOU TO THE OPENING OF STEVE MARK'S "UNCONTROLLED AIRSPACE"

### UNCONTROLLED AIRSPACE

An Exhibit of B&W Photographs by Steve Mark

From The Galt Airport Project, capturing the timeless moments of flight moments like a "One Zero Charlie"

Saturday, May 30, 2009 12 noon - 5 pm.

Galt Airport 5112 Greenwood Rd, Greenwood, IL 60038

PH: 815.334.9064 05/2009

This exhibit of 57 large format B&W photographs has been culled from the 200+ that make up the documentary work *The Galt Airport Project* which Steve shot throughout 2008. The photographs capture the people, activities, scenes and ethos that pervade this little patch of heaven in Greenwood, Illinois known as Galt Airport.

The project was photographed in 4x5" large format B&W using studio and press equipment from the 40's and 50's – an era in which high resolution and studio lighting were hallmarks of the profession. This ethic was carried forward in the current show and all prints on display are 16x20" or larger. In addition to the 57 matted and framed prints, all 200+ photographs from the project will be projected on a large screen throughout the evening. A photo-shoot setup illustrating the manner in which the studio equipment and techniques were used will be shown, and this setup will include a classic airplane. The use of the maintenance hangars at Galt to display this show will add to the unique atmosphere of a gallery opening in the very environment in which the photographs were created.

[over]

This event is one day only, Saturday, **May 30, 2009** from 12:00 noon until 9:00p.m. in the maintenance hangars at Galt airport. Admission is free (donations to cover the food costs are appreciated but not required), all ages are welcome, and everyone is invited. The photographer will be present to discuss the work and appetizers and soft drinks will be served courtesy of the **Friends Of Galt**.

If you are a devotee of grass roots aviation, love fine art photography or are interested in a fun evening at the *Friendliest Airport Around*, then make your way to Galt for this event.

And all you Galt regulars who volunteered over the last year for these seemingly innumerable photos, this is your first chance to see yourselves "in action". See you there!

For a sample of Steve's work that the EAA National has on it's web site, click this link:

### FOR THE MODELER ON A REALLY TIGHT BUDGET

**1** Build the frame by gluing match sticks together. You can build a bigger wing of lighter wood (and fit in even more engines).  
Use your imagination!

**2** Catch a couple of flies. Put them in a glass pot and put the pot in the freezer. In a couple of seconds the flies will be quite cold and motionless. Don't cool down your engines too much, it will kill them. If you put them in the refrigerator instead, it will take longer.

**3** While you're waiting for your engines to get cold and stiff, drop some contact glue on the places where you want to place your engines.

**4** Take your flies from the refrigerator/freezer. Place them on the pre-fitted glue pools.

**5** Breathe warm air on the flies. A miracle is happening! Your flies that were frozen a moment ago are now coming back to life again.

**6** Start the plane. If you did things correctly, it will fly! Sit back and enjoy watching the happy flies playing with the plane! None of them will have experienced anything like this before! ENJOY!

### 2009 CHAPTER CALENDAR

**CHECK [www.eaa932.org](http://www.eaa932.org) for latest information**  
**CHECK [www.galtairport.net](http://www.galtairport.net) for FOG events**
